I am very glad that we finally got Akari's route!
Seeing the earnest Akari acting all bashful and flustered is just too adorable.
I think that her route is the second best, right after Kanako's

Some facts

- You get 11 new beautiful CGs
- This route takes around 7-8h to finish

- Kanako has also some screentime and makes the route even better

. Worth waiting. Press "F" to pay "Respects" for Ma-bou.. Since this route is DLC I'll be tackling it separately from the [main review](#).

This route is another one of middling quality, comparative to Kanako's route in more ways than one. Akari is a character that is mentioned in passing in the original story, and this route does an excellent job fleshing out her character, giving her the trappings of a secretly childish straight-laced student. If you are familiar with the original game think Amane's route with a bit less of the over the top "too stupid to live" aspects. The route itself is heavily dependent on playing the original If My Heart Had Wings for the story to get across, and seems more like a removed route from that game, than a disconnected route like the rest of those in the base Flight Diary.

Briefly on censorship, this one is similarly censored, with awkward cutaways at moments that were clearly H-Scenes in the original release, but it is not egregious.

Overall the route is cute, and adds another narrative layer to an already great story.

So, is this route worth picking up? Once again, just like the entirety of Flight Diary, if you liked the original game, this will not disappoint you. It seems a bit overpriced, this is 1/3 of Flight Diary's and the original games price, and offers only one route with no choices whereas the others offer far more variety. But if you're already enjoying the IMHHW story, this portion is worth picking up. Waiting for a 50% sale or a bundle deal with Flight Diary is also probably a good call for those who aren't early adopters.
